CONTENTS OF VOLUME 73

No. 1, January, 1973

PAGE

On the Reaction of D-Amino Acid Oxidase with β-Chloro-D-alanine. *Y. Miyake, T. Abe, and T. Yamano* 1

Photooxidation of Ribonuclease U_1. *J. Hashimoto, K. Takahashi, and T. Uchida* 13

Acid Phosphatases from *Fusarium moniliforme*. III. Mode of Action of Acid Phosphatase II on bis-*p*-Nitrophenyl Phosphate. *H. Yoshida* 23

α-L-Rhamnosidases of the Liver of *Turbo cornutus* and *Aspergillus niger*. *Y. Kurosawa, K. Ikeda, and F. Egami* 31

Comparison of Properties and Inducibility of Glutamate Dehydrogenases in Rat Kidney and Liver. *S. Seyama, T. Saeki, and N. Katunuma* 39

Intracellular Distribution of Hepatic Catalase Activity in Rats Treated with Aminotriazole and Allylisopropylacetamide. *A. Nakamura, T. Hara, and S. Minakami* 47

Studies on N-Acetyl-β-D-glucosaminidase of *Aspergillus oryzae*. V. Demonstration of an Exo-type of the Enzyme and Determination of Partial Binding Energy of the ES-complex. *T. Mega, T. Ikenaka, H. Arita, K. Fukukawa, and Y. Matsushima* 55

The Structure and Function of Acid Proteases. I. Specific Inactivation of an Acid Protease from *Rhizopus chinensis* by Diazoacetyl-DL-norleucine Methyl Ester. *F. Mizobe, K. Takahashi, and T. Ando* 61

Further Studies on Glycosidases from the Liver of *Turbo cornutus* with Special Reference to β-Galactosidase, α-L-Arabinosidase, and β-D-Fucosidase Activities. *M. Yamada, K. Ikeda, and F. Egami* 69

Isolation and Characterization of a Novel Sulfoglycolipid, 'Seminolipid,' from Boar Testis and Spermatozoa. *I. Ishizuka, M. Suzuki, and T. Yamakawa* 77

Chemical and Physicochemical Characterization of Potato Proteinase Inhibitor I and Comparison of Its Specificity with Those of Inhibitors II-a and II-b. *T. Kiyohara, T. Iwasaki, and M. Yoshikawa* 89

Isolation and Some Properties of Glyceraldehyde 3-Phosphate Dehydrogenase from Vegetative Cells of *Bacillus cereus*. *K. Suzuki and K. Imahori* 97

Leucine Accumulation by Isoleucine Revertants of *Serratia marcescens* Resistant to α-Aminobutyric Acid: Lack of Both Feedback Inhibition and Repression. *M. Kisumi, S. Komatsubara, and I. Chibata* 107

Isolation and Characterization of a Thermolysin Peptide Containing Acetyllysine from Enzymatically Acetylated f2a1 Histone. *K. Horiuchi and D. Fujimoto* 117

R17 RNA Replicase. IV. Rifamycin Sensitive Component of the Replicase. *S.J. Igarashi* 123

Further Purification and Characterization of α-Mannosidase from Hog Kidney. *T. Okumura and I. Yamashina* 131

Purification and Properties of Nicotinamide Mononucleotide Amidohydrolase from *Azotobacter vinelandii*. *T. Imai* 139

PAGE

Disaggregation of Connective Tissue: Preparation of Fibrous Components from Sea Cucumber Body Wall and Calf Skin. *T. Matsumura, M. Shinmei, and Y. Nagai* 155

The Number and Size of Ribosomal Proteins in the Cellular Slime Mold *Dictyostelium discoideum*. *H. Ochiai, F. Kanda, and M. Iwabuchi* 163

Studies on Regulatory Functions of Malic Enzymes. II. Purification and Molecular Properties of Nicotinamide Adenine Dinucleotide-linked Malic Enzyme from *Escherichia coli*. *M. Yamaguchi, M. Tokushige, and H. Katsuki* 169

SHORT COMMUNICATIONS

Isolation and Characterization of α-D-Mannosidase from Baker's Yeast. *T. Kaya, M. Shibano, and T. Kutsumi* 181

Effect of Trinitrophenylation of Myosin on the Superprecipitation of Actomyosin. *N. Azuma and S. Watanabe* 183

Two Thermostable Phospholipases A in Porcine Pancreas. *T. Yamaguchi, Y. Okawa, and K. Sakaguchi* 187

Occurrence of Ceramide Phosphorylethanolamine Containing Hydroxy Fatty Acid in a Bivalve. *O. Itasaka, T. Hori, A. Uno, and M. Iwamori* 191

States of Imino Groups in Pepsin Measured by the Reactivity with *tertiary*-Butylhypochlorite. *S. Yamazaki, A. Matsushima, T. Hosoi, and Y. Inada* 195

No. 2, February, 1973

Studies on the Molecular Complex of Flavins. IV. Activity and FAD-fluorescence Change Caused by the Chemical Modification of Tryptophyl and Tyrosyl Residues in Glucose Oxidase. *H. Tsuge and H. Mitsuda* 199

Variation of Hexokinase Isoenzyme Pattern in Ehrlich Ascites-tumor Cells in Relation to the Utilization of Glucose in the Cells. *K. Murakami and S. Ishibashi* 207

Regulatory Function of Malate Dehydrogenase Isoenzymes in the Cotyledons of Mung Bean. *T. Asahi and M. Nishimura* 217

Studies on L-Glycerol-3-phosphate Dehydrogenases in Japanese Quail, *Coturnix coturnix japonica*. II. Comparison of Activity of Mitochondrial and Cytoplasmic L-Glycerol-3-phosphate Dehydrogenases in Testes and Liver of Developing Male Japanese Quail. *M. Yamada* 227

Mitogenic Activity of a Sepharose-concanavalin A Complex on Rabbit Spleen Cells. *M. Ono, H. Maruta, and D. Mizuno* 235

Further Studies on the Formation of Reconstituted Myosin Filaments. *I. Katsura and H. Noda* 245

Structure and Polymorphism of Light Meromyosin Aggregates. *I. Katsura and H. Noda* 257

Interaction of Troponin I Component and F-actin. *T. Fujii, M. Kawamura, K. Yamamoto, and K. Maruyama* 269

Purification and Properties of Pyocin S2. *I. Ohkawa, M. Kageyama, and F. Egami* 281

Comparative Studies on Glutamine, Serine, and Glycine Metabolisms in Ureotelic and Uricotelic Animals. *Y. Matsuda, Y. Kuroda, K. Kobayashi, and N. Katunuma* 291

Glycerokinase in Rat Liver. I. The Effect of Fat and Its Components on Glycerokinase Activity in Rat Liver. *K. Kida, K. Kobayashi, H. Kimura, and Y. Yugari* 299

Interactions of Mn^{2+}, Co^{2+}, and Ni^{2+} Ions with Hen Egg-white Lysozyme and with Its N-Acetylchitooligosaccharide Complexes. *K. Ikeda and K. Hamaguchi* 307

PAGE

Structural Transitions of Bovine Plasma Albumin. Location of Tyrosyl and Tryptophyl Residues by Solvent Perturbation Difference Spectra. *M. Sogami and S. Ogura* 323

Studies on Hemicellulases. IV. Purification and Properties of the β-Xylosidase Produced by *Aspergillus niger* van TIEGHEM. *S. Takenishi, Y. Tsujisaka, and J. Fukumoto* 335

DNA-dependent RNA Polymerase from Ehrlich Ascites Tumor Cells. I. Partial Purification and Characterization of RNA Polymerase II. *S. Natori, K. Takeuchi, and D. Mizuno* 345

Biochemical Studies on Sulfate-reducing Bacteria. XII. Some Properties of Flavodoxin from *Desulfovibrio vulgaris*. *K. Irie, K. Kobayashi, M. Kobayashi, and M. Ishimoto* 353

The Mechanism of Inhibition of Stem Bromelain by Its Specific Antibody. *M. Sasaki, S. Iida, and T. Murachi* 367

Immunological Cross-reaction between Thiol Proteases of Plant Origin: Stem and Fruit Bromelains. *S. Iida, M. Sasaki, and S. Ota* 377

Separation of Polar Glycolipids from Human Red Blood Cells with Special Reference to Blood Group-A Activity. *S. Ando and T. Yamakawa* 387

Appearance of Energy Conservation System in Rat Liver Mitochondria during Development. The Role of Adenine Nucleotide Translocation. *T. Nakazawa, K. Asami, H. Suzuki, and O. Yukawa* 397

Stability of Messenger RNA's for Microsomal NADPH-Cytochrome *c* Reductase and Cytochrome b_5 in the Livers of Normal and Phenobarbital-treated Rats. *S. Matsumura and T. Omura* 407

Amino Acid Sequence of a Human Kappa Type Bence-Jones Protein. I. Tryptic Peptides of Protein Ni. *T. Shinoda* 417

Amino Acid Sequence of a Human Kappa Type Bence-Jones Protein. II. Chymotryptic Peptides and Sequence of Protein Ni. *T. Shinoda* 433

Heterogeneity of Crystalline Taka-amylase. *Y. Yamakawa and T. Okuyama* 447

SHORT COMMUNICATIONS

Enzyme-Substrate Complex of Pancreatic Lipase and Its Artificial Substrates, Riboflavin Di- and Tributyrate. *K. Yagi, M. Osamura, and N. Ohishi* 455

Side Chain Cleavage Activity for the Bound Cholesterol of P-450 from Bovine Adrenocortical Mitochondria. *N. Ando* 459

PRELIMINARY NOTE

The Crystal Structure of Bonito (Katsuo) Ferrocytochrome *c* at 2.3 Å Resolution. *T. Ashida, N. Tanaka, T. Yamane, T. Tsukihara, and M. Kakudo* 463

No. 3, March, 1973

Studies on the Biosynthesis of Macrophage Migration Inhibitory Factor in Delayed Hypersensitivity. I. Effects of Inhibitors of Nucleic Acid and Protein Synthesis on the Production of Macrophage Migration Inhibitory Factor. *Y. Mizoguchi, S. Yamamoto, and S. Morisawa* 467

Amino Acid Composition and Some Immunological Properties of a Minor Ribonuclease from Bovine Seminal Vesicles. *M. Irie, F. Suito, and T. Saito* 475

Studies on Rat Liver Ornithine δ-Aminotransferase. Chemical Modifications of Amino Acid Residues. *T. Matsuzawa and M. Nishiyama* 481

PAGE

Studies on the Substrate Specificity of Taka-amylase A. XI. Effect of Release of *p*-Phenylazobenzoyl Residue from *p*-Phenylazobenzoyl Taka-amylase A on the Enzymatic Action. *K. Omichi, T. Ikenaka, and Y. Matsushima* 491

The Rates of Incorporation of Inorganic Orthophosphate, Glycerol, and Acetate into Phospholipids of Rabbit Sarcoplasmic Reticulum. *K. Waku and Y. Nakazawa* 497

Effects of High Pressure on the Stability and Activity of Allosteric Phosphoenolpyruvate Carboxylase from *Escherichia coli*. *K. Izui* 505

Immunochemical Studies on Function of NADH: Hemeprotein Oxidoreductase in Electron Transport System of Chromatophores from *Rhodospirillum rubrum*. *Y. Nisimoto, J. Yamashita, and T. Horio* 515

Immunological Studies on Function of NADH: Quinone Oxidoreductase in Electron Transport System of Chromatophores from *Rhodospirillum rubrum*. *Y. Nisimoto, J. Yamashita, and T. Horio* 523

Sarcosomal Aconitase of Silkworm. *E. Soeda, T. Torikata, and S. Akune* 529

Formation and Decomposition of Pyrophosphate Related to Bacterial Photophosphorylation. *K. Nishikawa, K. Hosoi, J. Suzuki, S. Yoshimura, and T. Horio* 537

Kinetic Properties of the Myosin-Phosphate-ADP Complex. *A. Inoue and Y. Tonomura* 555

Studies on Enzymatically Active Subfragments of Myosin Adenosine Triphosphatase. II. Preparation by Nagarse Digestion and Comparison with Subfragments Prepared by Using Different Proteolytic Enzymes. *Y. Yazawa and K. Yagi* 567

Structural Change of DNA during λ-Phage Lysogenization and Induction. *M. Obinata and D. Mizuno* 581

Change in DNA-associated Proteins with Concomitant Change in Structure of DNA during Phage Induction. *M. Obinata and D. Mizuno* 591

Enzymatic Cleavage of (+)Citramalate into Pyruvate and Acetyl-CoA in *Bacillus* sp. *K. Sasaki and H. Katsuki* 599

Purification and Some Properties of Na, K-transport ATPase. I. Solubilization and Stability of Lubrol Extracts. *T. Nakao, M. Nakao, N. Mizuno, Y. Komatsu, and M, Fujita* 609

Adenosine 3′, 5′-Monophosphate and Histone Phosphorylation during Enzyme Induction by Glucagon in Rat Liver. *M. Takeda and Y. Ohga* 621

N-Acyl Specificity of Taka-N-acetyl-β-D-glucosaminidase Studied by Synthetic Substrate Analogs. I. Preparation of *p*-Nitrophenyl 2-Acylamino-2-deoxy-β-D-glucopyranosides and Their Susceptibility toward Enzymatic hydrolysis. *K. Yamamoto* 631

The Inhibition Mechanism of the Cytochrome Oxidase Reaction. IV. The Nature of the Kinetically Inactive Complex of Cytochrome Oxidase with Cyanide. *S. Yoshikawa and Y. Orii* 637

The Nucleases from *Acrocylindrium* sp. II. Crystallization and Chemical Properties of Endonuclease. *I. Suhara and M. Yoneda* 647

SHORT COMMUNICATIONS

Transition of Myosin ATPase upon Addition of EDTA. *K. Shibata-Sekiya* 655

Purification and Some Properties of *Achromobacter cycloclastes* Azurin. *H. Iwasaki and T. Matsubara* 659

Application of Trifluoroacetyl Derivatives to Sugar and Lipid Chemistry. II. Gas Chromatographic Quantitation of Methyl Glycosides. *S. Ando, T. Ariga, and T. Yamakawa* 663

Heterogeneity of the Lytic Activity for Yeast Cell Wall Observed among the Components of an *Arthrobacter* Glucanase. *K. Doi, A. Doi, T. Ozaki, and T. Fukui* 667

Inactivation of *Rhodotorula glutinis* Acid Protease by Diazoacetyl Compounds. *C.L. Liu, K. Ohtsuki, and H. Hatano* 671

PAGE

PRELIMINARY NOTES

Specific Chemical Modifications of Acid Proteases in the Presence and Absence of Pepstatin. *K. Takahashi and W.-J. Chang* 675

Interaction of Chicken Erythrocyte AMP Deaminase with Chelating Agents. *M. Yoshino, Y. Kawamura, and N. Ogasawara* 679

No. 4, April, 1973

Physico-chemical and Reassociation Properties of *E. coli* Ribosomal Subunits. *Y. Igarashi, T. Imamura, M. Suzuki, and Y. Miyazawa* 683

Natural F-actin. VI. Degeneration of Natural F-actin and Its Protection by ATP. *S. Suzuki, H. Noda, and K. Maruyama* 695

Alkylation of Ribonuclease from *Aspergillus saitoi* with Iodoacetate and Iodoacetamide. *M. Harada and M. Irie* 705

Heterogeneity of Hemoglobin from Arca (*Anadara satowi*). Molecular Weights and Oxygen Equilibria of Arca Hb I and II. *S. Ohnoki, Y. Mitomi, R. Hata, and K. Satake* 717

Studies on the Circadian Rhythm of Phosphoenolpyruvate Carboxykinase Activity in Rats. I. Mechanism of Circadian Increase in Liver Enzyme with Special Reference to Hormonal and Dietary Effects. *M. Suda, K. Nagai, and H. Nakagawa* 727

Enzymatic Activity that Catalyzes Degradation of N^6-(Δ^2-Isopentenyl)adenosine. *R.H. Hall and G. Mintsioulis* 739

N-Acyl Specificity of Taka-N-acetyl-β-D-glucosaminidase Studied by Synthetic Substrate Analogs. II. Preparation of Some *p*-Nitrophenyl 2-Halogenoacetylamino-2-deoxy-β-D-glucopyranosides and Their Susceptibility to Enzymatic Hydrolysis. *K. Yamamoto* 749

Proteolipid of Bovine Brain White Matter: Phospholipid Components. *Y. Uda and Y. Nakazawa* 755

Calorimetric Studies on the Mutarotation of D-Galactose and D-Mannose. *K. Takahashi and S. Ono* 763

Actinomycin D-Insensitive Induction of Rat Liver Glucose-6-phosphate Dehydrogenase by Carbon Tetrachloride Injury. *A. Watanabe and K. Taketa* 771

Purification and Some Properties of Na, K-transport ATPase. II. Preparations with High Specific Activity Obtained Using Aminoethyl Cellulose Chromatography. *T. Nakao, M. Nakao, F. Nagai, K. Kawai, Y. Fujihira, Y. Hara, and M. Fujita* 781

Acylation of Lysophospholipids Including Lysoplasmalogen by Cultured Human Amnion Cells (FL Cells). *M. Matsumoto and Y. Suzuki* 793

Two Types of Soluble Malic Enzyme in Rat Tissues. *T. Saito and K. Tomita* 803

Purification of Tyrosine: tRNA Ligase from *Saccharomyces cerevisiae* αS288C. *Ž. Kućan and R.W. Chambers* 811

Transformation of Non-covalent Interactions in Nucleoproteins into Covalent Bonds Induced by Nucleophilic Reagents. I. The Preparation and Properties of the Products of Bisulfite Ion-catalyzed Reaction of Amino Acids and Peptides with Cytosine Derivatives. *I.V. Boni and E.I. Budowsky* 821

Studies on Proteolytic Enzymes (Pronase) of *Streptomyces griseus* K-I. III. Purification and Proteolytic Specificity of Alkaline Proteinase C from Pronase. *Y. Narahashi and K. Yoda* 831

An Enzyme Reducing Adenosine ^{1}N-Oxide in *Escherichia coli*, Amine N-Oxide Reductase. *M. Sagai and M. Ishimoto* 843

PAGE

Action of Pepsin on Synthetic Substrates. II. Diglycyl-L-phenylalanyl-L-phenylalanyl (and L-tyrosyl)-glycines: Sensitive Synthetic Substrates for Pepsin. *H. Yonezawa, S. Terada, and N. Izumiya* 861

Cysteine-catalyzed Hydrogen Isotope Exchange at Position 5 of Uridylic Acid. *Y. Wataya, H. Hayatsu, and Y. Kawazoe* 871

DNA Dependent RNA Polymerase from Ehrlich Ascites Tumor Cells. II. Factors Stimulating the Activity of RNA Polymerase II. *S. Natori, K. Takeuchi, K. Takahashi, and D. Mizuno* 879

SHORT COMMUNICATION

On the Nitrogenase Components of *Azotobacter vinelandii*. *S. Kajiyama and Y. Nosoh* 889

PRELIMINARY NOTES

Structural Study on Tetraglycosyl Ceramide and Gangliosides Isolated from Human Red Blood Cells. *S. Ando, K. Kon, M. Isobe, and T. Yamakawa* 893

Evidence for the Presence of a Complex of Collagenase with α_2-Macroglobulin in Human Rheumatoid Synovial Fluid: A Possible Regulatory Mechanism of Collagenase Activity *in Vivo*. *S. Abe and Y. Nagai* 897

No. 5, May, 1973

Structure and Function of D-Amino Acid Oxidase. V. Effect of Urea on the Structure of the Free Enzyme and Its Benzoate Complex. *N. Sugiura, H. Ōhama, A. Kotaki, and K. Yagi* 901

Structure and Function of D-Amino Acid Oxidase. VI. Relation between the Quaternary Structure and the Catalytic Activity. *K. Yagi, N. Sugiura, H. Ōhama, and N. Ohishi* 909

Ribosome Degradation and Degradation Products in Starved *Escherichia coli*. VI. Prolonged Culture during Glucose Starvation. *S. Okamura, H.B. Maruyama, and T. Yanagita* 915

Studies on Kallikrein Inhibitors from Potatoes. IV. Isolation of Two Inhibitors and Determination of Molecular Weights and Amino Acid Compositions. *Y. Hojima, C. Moriwaki, and H. Moriya* 923

Studies on Kallikrein Inhibitors from Potatoes. V. Characterization of Two Isolated Inhibitors. *Y. Hojima, C. Moriwaki, and H. Moriya* 933

Polynucleotides XVII. Effect of the Diphosphates of Aristeromycin and Cycloadenosine on the Polymerization of Adenosine Diphosphate by Polynucleotide Phosphorylase. *M. Ikehara and T. Fukui* 945

The Enzymatic Measurement of Binding of First Component of Guinea Pig Complement with Formalized Sheep Erythrocytes Sensitized with Rabbit Antiserum. *Y. Mori, N. Kawai, and J. Koyama* 951

Circular Dichroic Studies on Protohemoproteins. II. *Limnodrilus* Hemoglobin and Its Derivatives. *Y. Okada and K. Okunuki* 959

Circular Dichroism Studies on Protohemoproteins. III. Cytochrome b_5 from Rabbit Liver Microsomes, and Cytochrome *b*-557.5 from *Rhodospirillum rubrum*. *Y. Okada and K. Okunuki* 965

Preparation and Properties of Lysozyme Modified by Fluorescein-Isothiocyanate. *M. Hiramatsu, N. Okabe, and K. Tomita* 971

Purification and Some Properties of Na, K-transport ATPase. III. Comparison of Lipid and Protein Components of Na, K-ATPase Preparations at Various Purification Steps from Pig Brain. *K. Kawai, M. Nakao, T. Nakao, and M. Fujita* 979

PAGE

Uncoupling of Oxidative Phosphorylation of Rat Liver Mitochondria by Chinoform. *N. Yamanaka, T. Imanari, Z. Tamura, and K. Yagi* 993

Effect of pH on the Stability of Collagen Molecule in Solution. *T. Hayashi and Y. Nagai* 999

Synovial Collagenase and Joint Diseases: The Significancy of Latent Collagenase with Special Reference to Rheumatoid Arthritis. *S. Abe, M. Shinmei, and Y. Nagai* 1007

Major Pathways of Serine and Glycine Catabolism in Various Organs of the Rat and Cock. *T. Yoshida and G. Kikuchi* 1013

The Nucleases from *Acrocylindrium* sp. III. General Properties and Specificity of Endonuclease. *I. Suhara* 1023

Studies on Peroxisomes. IV. Intracellular Localization of $NADH_2$-glyoxylate Reductase in Rat Liver. *S. Suzuki, T. Suga, and S. Niinobe* 1033

Identification of the Reactive Site of Potato Proteinase Inhibitor II-a. *T. Iwasaki, T. Kiyohara, and M. Yoshikawa* 1039

Location of Heme *a* in Cytochrome *a*. I. Combination of Alkyl Isonitriles with Cytochrome *a*. *T. Yamamoto and Y. Orii* 1049

Regulation of Aspartate Family Amino Acid Biosynthesis in *Brevibacterium flavum*. VII. Properties of Homoserine O-Transacetylase. *R. Miyajima and I. Shiio* 1061

Kinetic Studies on Hydrogenase. Parahydrogen-Orthohydrogen Conversion and Hydrogen-Deuterium Exchange Reactions. *T. Yagi, M. Tsuda, and H. Inokuchi* 1069

Studies on Rat Liver Catalase. VI. Biosynthesis of Catalase by Free and Membrane-bound Polysomes. *T. Sakamoto and T. Higashi* 1083

Identification of Asparagine as the Site of Glycosylation in Glycoprotein Biosynthesis. *M. Kohno and I. Yamashina* 1089

Studies on the Polypeptide Elongation Factors from *E. coli*. III. Molecular Characteristics of EF-Tu-guanosine Diphosphate, EF-Ts, and EF-Tu-Ts Complex. *K. Arai, M. Kawakita, Y. Kaziro, T. Kondo, and N. Ui* 1095

SHORT COMMUNICATIONS

A Sensitive Method for Determination of Deoxyribonuclease (endonuclease) Activity Using λdv DNA and a Nitrocellulose Membrane Filter. *T. Mukai, K. Matsubara, and Y. Takagi* 1107

Interaction of Troponin I and Tropomyosin. *K. Yamamoto and K. Maruyama* 1111

Production of Anti Phenobarbital Antibody in Rabbits by Immunization with *p*-Azophenobarbital Acetylated Bovine Serum Albumin. *H. Satoh, Y. Kuroiwa, and A. Hamada* 1115

PRELIMINARY NOTES

Cardiac Troponin. *R. Tsukui and S. Ebashi* 1119

Effect of Ethanol on D-Amino Acid Oxidase. *H. Ōhama, N. Sugiura, and K. Yagi* 1123

Heterogeneity of a Human Erythrocyte Membrane Glycoprotein. *J. Azuma, M. Janado, and K. Onodera* 1127

Isolation of a Ribonuclease Associated with the Formation of Phage λcI. *T. Ando, S. Ikawa, and E. Hayase* 1131

No. 6, June, 1973

Interrelation among the Three Components of Troponin and Tropomyosin Studied by Their Kinetic Effects on the ATPase Reaction of Actomyosin. *M. Shigekawa and Y. Tonomura* 1135
